October 2009

Mr. Anderson is an inspiration, not only to his peers with mobility impairments, but also to all the citizens of our country with his dedication and enthusiasm for his work. He cares very much about the plight of people with disabilities and works very hard as a radio presenter to highlight important issues, stimulate communication and provide better opportunities for them.

Doug is not afraid to ask difficult questions, challenge the system or put the spotlight where it needs to be. "Doug Anderson combines radio that entertains and informs with radio that cares and matters."

He sacrifices much of his personal life and time to manage the difficult hours of a presenter of various shows.

Doug has a wonderful challenge in his message for us:

"I am a firm believer in the M.A.D concept - Making A Difference - life is about Making A Difference. Here's a thought for you: if everybody in the world Made A Difference just once in their lifetime, that is roughly 6 BILLION positive changes that will take place in your lifetime! It starts with you and me....Go M.A.D."

Mr. Anderson leads by setting an exceptional example and an award will honor his hard work.
